

Endex International

Innovation for the Future

ENDEX ABC 2750™

Endothermic Chemical Foaming and Nucleating Agent

Endex ABC 2750™ is a 50% concentrate in a polymer carrier. It can be used in a wide range of commodity and engineering plastics, combining quality and efficiency with the benefits of versatility and cost effectiveness.

Endex ABC 2750™ utilizes innovative technology to produce superior quality foamed products. It generates fine, closed-cell foams, which result in moldings and extrusions of high quality.

Endex ABC 2750™ Processing Aid can be used in injection molding for cycle time reduction, improved polymer flow, reduced processing temperatures, improved weld line strength, and to eliminate molded-in stresses which cause warp and sinks.

Endex ABC 2750™ is intended for use in a wide variety of processes, including:

- Injection molding for cycle time reduction, sink marks, warp reduction, shrink control.
- Structural Foam molding (SFM). Gas Counter-pressure foam molding.
- Nitrogen SFM for finer cell structures and extra weight reduction.
- Gas Assist molding for extra weight reduction and sink elimination.
- Extrusion of Sheet, Film, and Profiles.
- Blow Molding, Rotational Molding.

Endex ABC 2750™ use levels will vary with the application, but the following guidelines can be used as a starting point. Optimization for each application is recommended:

- | | |
|------------------------------|-------|
| • Structural Foam Molding | 1.0 % |
| • Sink Mark Elimination | 0.2 % |
| • Nitrogen Foam Molding | 0.3 % |
| • Extrusion and Blow Molding | 0.3 % |

Endex ABC 2750™ has many advantages for the plastics processor, including:

- Fine cell structure
- Shorter cycle times
- Faster extrusion
- Thick, smooth skins in SFM
- Fast degassing
- Fast painting and decorating
- No plate-out on molds
- Beryllium-copper compatible
- G.R.A.S. or FDA sanctioned ingredients

Endex ABC 2750™ is available in 25 kg cartons, or 500 kg boxes.
